

ABSTRACT OF THE DISCLOSURE

Tape cutting-out equipment to wind and cut out tape supplied from a
pancake in plural kinds of winding lengths on a reel, the equipment is
5 equipped with a tape supplying device supplying tape from the pancake P, a
tape winding device winding the supplied tape from the tape supplying device,
a memory unit memorizing position data of defect portions of the tape in the
pancake, a winding length deciding unit deciding a winding length of the tape
based on the position data read out from the memory unit, a cutting device
10 cutting the tape, and a cutting control unit controlling making the cutting
device cut the tape at a timing when the tape winding device winds tape of the
winding length decided by the winding length deciding unit.
